Stealth Switch

***All
Electric
Outboard***

**Powerful, Affordable,
Versatile**

**Choose from Battery
Voltages ranging from 24V
to 96V to fit your budget**

About The Stealth Switch

The Stealth Switch does what no other electric outboard does by giving you a choice in battery voltage from 24V to 96V with the same outboard. This helps to you to stay in your budget, while giving you the option to increase power later by simply adding more batteries to make higher voltages up to 96 volt.

The Stealth Switch starts out life as a brand new 4 stroke outboard without the power head, supplied by a Yamaha competitor.

All the components on this outboard, with the exception of the all electric power head, can be replaced with parts from a local Yamaha Marine dealer.

The Stealth Switch is powerful enough to plane boats with an average package weight of up to 1,250 pounds.

The Stealth Switch available in tiller or remote control, long shaft or short shaft.

It's All About The Chemistry!

We chose Lithium Nickel Manganese Cobalt Oxide (LiNiMnCoO_2), more commonly known as NMC, as our battery chemistry of choice. The short explanation as to why is that it is the best combination of power, weight, size and price.

For the **Stealth Switch**, we provide complete plug and play battery systems that include a battery pack and active cell balancing in an IP67 water resistant case, charger and state of charge meter. We also include all needed cables, including snap together quick connects. Installation is fast and easy. We have everything you need to hit the water.

We Provide A Complete Solution

The Stealth Throttle controls speed and direction with a single lever action with these great features:

- Single lever speed and direction control by wire. No more steel cables to adjust!
- 16-foot Throttle Cable
- Kill Switch
- Locking Neutral Position

Stealth Battery Connection Kit and Battery Monitor

- 6ft Battery Connection Harness to connect your batteries to your Stealth Electric Outboard.
- Battery monitor to calculate ampere-hours consumed and the state of charge of a battery.

Stealth Lithium-Ion Battery Chargers

- Input Voltage AC: 90-265 VAC
- Power: 480W
- (Faster charging options available)

Stealth Lithium-Ion NCM Battery

48V/120Ah With Smart BMS Standard.
Series connection compatible up to 96V.

Specifications:

CONTINUOUS POWER	6/12/25 HP
VOLTAGE	24/48/96 VDC
CURRENT	180 AMPS
MOTOR TYPE	PMAC
COOLING SYSTEM	WATER COOLED
CONTROL	REMOTE AND TILLER
THROTTLE	SIDE MOUNT, 16' CABLE
GEAR RATIO	2.08:1
TRIM & TILT	MANUAL TILT
PROPELLER	3- 9.25 X 11"
WEIGHT	111 LBS
TRANSOM HEIGHT, SHORT	16.7"
TRANSOM HEIGHT, LONG	21.7"
